

# DAZZLE

## LAUNDRY DETERGENT WITH ODOR ELIMINATOR

## FACT SHEET

### THE CHALLENGE

Homestyle laundry machines are becoming the mainstay in many healthcare facilities across the country, which has created new challenges. Facilities that contain memory care units are dealing with incontinence and heavily soiled linen. Dealing with these challenges with traditional homestyle laundry detergents has produced clean linen, but very offensive odors often remain. This problem leads to washing the linen multiple time and creates inefficiencies – waste of labor, water and chemical to produce marginal results.

Athletic departments is another area facing tough odor challenges. Performance gear / dri-fit materials are difficult to remove odors from because of the tight weave of the fabric.

### THE SOLUTION

A laundry detergent designed for use in all water and soil conditions. Designed to remove odors and tough stains from all fabrics. Flexible enough to be used on it's own in homestyle machines or larger OPL machines.

### THE FEEDBACK

#### Karen / Lino Lakes Assisted Living

*"We really appreciate the new laundry detergent. So far all the staff love it and have no complaints of remaining odor in the laundry after only one wash. Thank you greatly!!!"*

#### McNulty & Associates / New York

*"The popularity of DAZZLE deodorizing detergent has continued to grow. This product has solved laundry odor issues in every account we put it in so far. Many thanks to the product development team".*

### USE DIRECTIONS

Dispense **DAZZLE** directly from it shipping container using an automatic liquid dispensing system. The authorized representative servicing your facility will establish a program suitable for your individual requirements. General usage of **DAZZLE**:

When used in a 3, 4, or 5 product system, use 1.5-3.0 ozs per 50# machine.

When used on it's own in a homestyle machine, use 2.0-2.5 ozs per load.
