

**TOOLS NEEDED:** Small Bubble Level, Marking Pen, Drill, Drill Bits, Hammer, and Screw Driver.

**LOCATE THE FOLLOWING ITEMS FROM THE INSTALLATION KIT:**

**Service Tray Components:**

- Service Tray Ring Base
- Service Tray
- Block Screen

**Dose Activators  
Screws, Anchors**

**1** Determine location to mount Dose system, keeping in mind that there is enough distance between Service Tray and Dose Activator to fill quart bottle.

**6** Determine activator height by placing quart bottle on installed service tray.

**2** Level Service Tray Ring Base and mark holes to be drilled.

**7** Level activator and mark holes for Activator.

**3** Drill holes and install anchors appropriate for wall type.

**8** Drill holes and install anchor appropriate for wall type.

**4** Install Service Tray Ring Base with provided screws.

**9** Install Activator with provided screws.

**5** Insert Service Tray and Screen Block.

**10** Apply provided safety sticker to Activator and repeat installation steps for second product.

## INSTALLATION INSTRUCTIONS CONTINUED:

**11** Apply appropriate labels to the quart bottles.

**12** Install provided wall chart next to installation.

## HOW TO OPERATE DOSE ACTIVATOR

### Step 1

Fill a pre-labeled quart bottle with water to appropriate fill line.

### Step 2

Dispense the pre-measured chemical concentrate by moving the lever to the left.

### Step 3

To make sure your DOSE system is ready for the next user, move the lever to the right.

**DOSE can also be used with water proportioners. An authorized DOSE distributor representative will install the proper equipment if this is the desired method of dispensing.**
